Confidentiality

This document contains sensitive information that could be used to impact on the security of the services that are offered by Ideagen. It is to be treated as confidential and shall not be used for any other purpose. It shall not be copied or disclosed to third parties as a whole or in part without the prior consent of Ideagen.

Release Notes

Summary of issues

The purpose of this document is to provide a summary of the corrections and enhanced features that have been included in this release.

If any further details are required, please contact your Pentana Audit MK Support Team at mksupport@ideagen.com

This update includes the following items:

Issue Type	Count
Support Issues	3

Recommendations

MKI-2009 – Support Issue

Resolved an issue where users were unable to open the 'Finding-External Audit' recommendation type. All recommendation types are now accessible from the Business User Portal.

Audit Work

MKI-1945 – Support Issue

Fixed a bug that allowed users to edit embedded files in read-only view. Users are now correctly restricted from modifying embedded files when opened in read-only mode.

Methodologies

MKI-2005 – Support Issue

Enhanced the Recommendation View Configuration logic. When users create new Finding Templates, any sections with no associated data are now properly removed upon submission. This prevents residual metadata from persisting in the template object.
